

Update: CABLE in ACCESS

- Comparing ACCESS1.3 and ACCESS1.4 coupled simulations (no carbon cycle).
- Using the last 50yrs of the 250y PI simulations.
- The main difference between the models is CABLE*.
- $\text{Bias} = (\text{Model field}) - (\text{ERA Interim})$

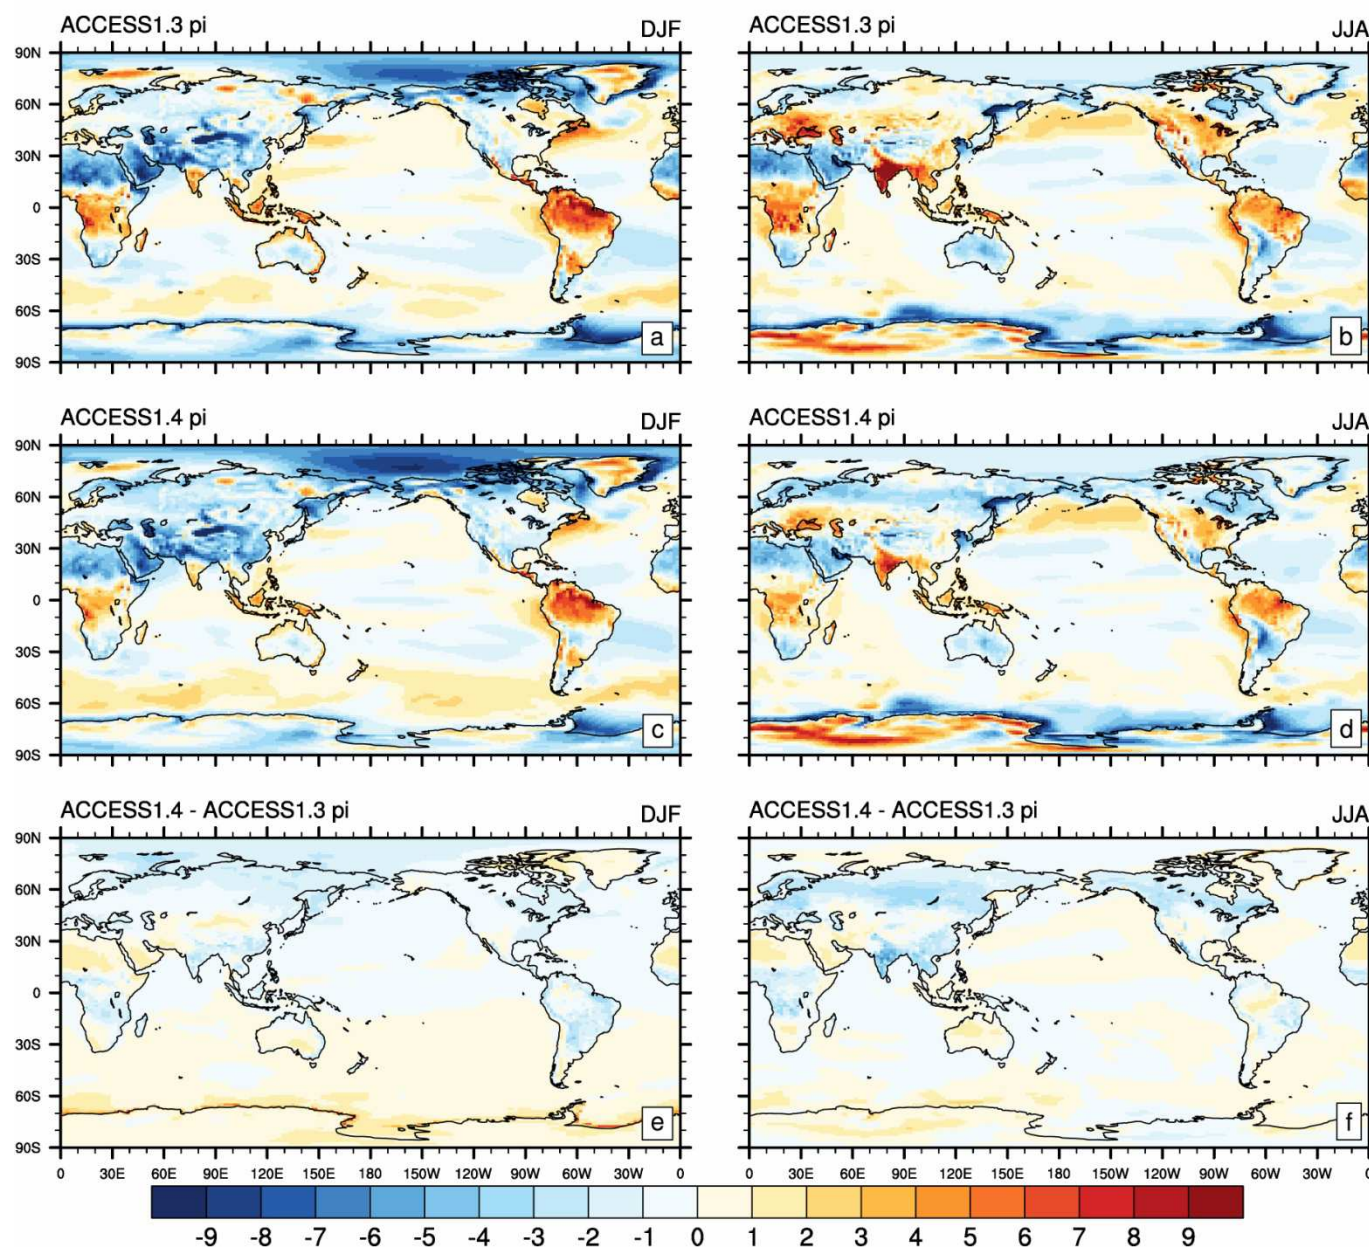

Seasonal Mean Screen Temperature Bias (K)

Seasonal Mean Precipitation Bias (mm/day)

Seasonal Mean Max Screen Temperature Bias (K)

Seasonal Mean Min Screen Temperature Bias (K)
