# NU-WRF update

Winter temperature cold bias is fixed
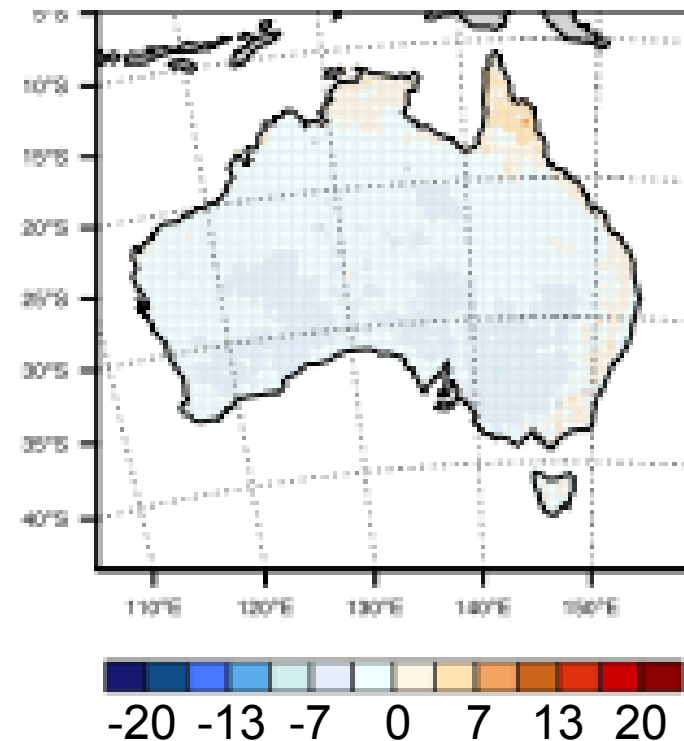

Required utilisation of new hydrology developed by M. Decker

June mean maximum T at 2m: Difference with AWAP

Current CABLE   New hydrology

NU-WRF update

Benchmark simulation:

    30 years offline LIS-CABLE simulation, 1959 – 1988

    5 years coupled simulation, 1989 – 1993

Spin-up is done:

    Shows acceptable results.

    Improvements probably possible by looking into the parameters values.

Coupled simulation is started.

About 1-2 weeks away to share code and scripts with community
